Environmental Policy

T4 Sustainability Ltd (T4) is a company based in the East Midlands, that has been providing renewable energy, energy/resource efficiency, environmental management, and carbon reduction consultancy and installation services, to government, businesses, householders and communities since 2002.

As a company working towards a more sustainable future, we are aware that our activities and processes have environmental impacts, and we acknowledge our responsibility to manage and control these. In order to achieve this, based on our current practice, and the findings of our baseline review, the Directors of T4 are committed to

- explore solutions to environmental issues in partnership with our subcontractors, clients and the wider population;
- review on a bi-annual basis, all the environmental aspects of our activities;
- reduce emissions from activities such as transport to sites by working locally, sharing vehicles when possible, the use of low carbon fuels in our vehicles where practicable, and use a DEFRA approved biomass boiler in our industrial unit;
- deliver further environmental improvement through the equipment we install, and the advice that we provide through our consultancy work;
- prevent all kinds of pollution where practicable;
- minimise our use of materials, energy and water in our premises and site work, and to minimise the carbon emissions arising from all our activities;
- minimise our generation of waste, and to use the best path within the waste hierarchy for each stream of materials produced in our activities;
- consider, subject to the availability of information, the environmental policies and practices of our suppliers in the procurement process, and
- comply with applicable environmental legislation and other requirements.

The Board of Directors is committed to the review and enhancement of this Policy. Along with our objectives and targets, this will be reviewed and revised every two years, in order to ensure continual improvement in the environmental management system, and thereby our environmental performance. This Policy will be publicly available on our website, and further information will be available as requested by stakeholders.

Signed,

John Beardmore, Managing Director.
